

# Virtual Public Meetings

Provide virtual and analog formats for residents to participate, while streamlining workflows behind the scenes.

## Take your meeting solutions from disconnected to *unified*.

Virtual meetings hosted with PublicInput.com have **increased attendance by more than 240%** on average, compared to their in-person counterparts.

This means 240% more participation to be transcribed, attributed, and cataloged, as well as a public expectation for the format to be available beyond COVID-19 restrictions. Optimize this workflow by leveraging **the only virtual public meetings solution purpose-built for government.**

Allow the public to participate from outside your videoconference, so that your meetings are always **equitable and secure**.

**Ensure legal compliance** by offering numerous participation formats, like phone lines, livestreams, and texts.

**Cut costs** with autotranscription and comment management directly within the meeting dashboard.

Permanently store meeting history and participant information in the dashboard, **synchronized with all other public engagement** in your community.
